Highlights

- Automating the Documentation and Certification of NASA Software. May 2004.
- Simulation-Based Verification of Autonomous Controllers via Livingstone Path Finder. May 2004.
- Verification of Diagnosability using Model Checking. April 2004.
- Lightweight Automatic Generation of Traceability Information. December 2003.
- Software Engineering Research Infusion ViTS. November 2003.
- Confidence Tool for Neuro-Adaptive Controllers. September 2003.
- Extending Code Generators with Certification Capability. July 2003.
- Correctness of Software Safety Policies. April 2003.
- Automatic Software Design Document Generation. March 2003.
- V and V of Neural Networks. March 2003.
- NN Process Guides-Increases Safety and Reduce Cost. March 2003.
- Component Assumptions. February 2003.
- Presentation on System-Level Verification for Autonomous Systems: Automatic Assumption Generation for Component Verification. February 2003.
- High Level Data Race Detection. February 2003.
- Certification Support for Automatically Generated Programs. January 2003.
- Runtime Verification with Java PathExplorer. December 2002.
- ASE Group Program V&V History 1997-2002. December 2002.
- Using Model Checking to Discover Automation Surprises. November 2002.
- V and V of Neural Networks. November 2002.
- Explaining the Cause of an Error. November 2002.
- Certification Technology for Auto-generated Code. November 2002.
- Generating Assumptions. November 2002.
- Generalized Symbolic Execution for Model Checking and Testing. November 2002.
- Deadlock Analysis with Fewer False Positives. November 2002.
- Verification for Next-Generation Space Shuttle. November 2002.
- Other NASA Links

Automating the Documentation and Certification of NASA Software. May 2004. Ewen Denney

Simulation-Based Verification of Autonomous Controllers via Livingstone Path Finder. May 2004. Charles Pecheur and Tony Lindsey

Verification of Diagnosability using Model Checking. April 2004. Charles Pecheur

Lightweight Automatic Generation of Traceability Information. December 2003. Julian Richardson

Software Engineering Research Infusion ViTS. November 2003. Thomas Pressburger and Lawrence Markosian

Confidence Tool for Neuro-Adaptive Controllers. September 2003. Johann Schumann and Pramod Gupta

Extending Code Generators with Certification Capability. July 2003. Ewen Denney

Correctness of Software Safety Policies. April 2003. Ewen Denney

Automatic Software Design Document Generation. March 2003. Bernd Fischer, Phil Oh, and Johann Schumann.

V and V of Neural Networks. March 2003. Pramod Gupta and Johann Schumann

NN Process Guides-Increases Safety and Reduce Cost. March 2003. Stacy Nelson

Component Assumptions. February 2003.

Presentation on System-Level Verification for Autonomous Systems: Automatic Assumption Generation for Component Verification. February 2003. Dimitra Giannakopoulou and Corina Pasareanu

High Level Data Race Detection. February 2003. Klaus Havelund

Certification Support for Automatically Generated Programs. January 2003. Johann Schumann

Runtime Verification with Java PathExplorer. December 2002. Klaus Havelund

ASE Group Program V&V History 1997-2002. December 2002. Klaus Havelund and Willem Visser

Using Model Checking to Discover Automation Surprises. November 2002. Guillaume Brat and Willem Visser

V and V of Neural Networks. November 2002. Pramod Gupta and Johann Schumann

Explaining the Cause of an Error. November 2002. Willem Visser

Certification Technology for Auto-generated Code. November 2002. Jonathan Whittle

Generating Assumptions. November 2002. Dimitra Giannakopoulou and Corina Pasareanu

Generalized Symbolic Execution for Model Checking and Testing. November 2002. Corina Pasareanu and Willem Visser

Deadlock Analysis with Fewer False Positives. November 2002. Klaus Havelund

Verification for Next-Generation Space Shuttle. November 2002. Charles Pecheur
